Expertise

- Leadership
- Management
- Data Engineering
- Data Warehousing
- Dashboarding
- Analytics
- Operations
- Snowflake, Teradata, SQL Server
- MicroStrategy, Tableau
- SQL, Pascal OOP, Python

Languages

English

Spanish

French

Romanian

Education

2004
Master's Degree
Dimitrie Cantemir, BUCHAREST

2003
Bachelor in Economics
Dimitrie Cantemir, BUCHAREST

Experience

September 2023 - Present
The Workshop - Malaga, Spain
Head of Engineering

- Leadership role seeking excellence in all data engineering teams and disciplines
- Promote department and organizational strategies and practices
- Lead the adoption of technologies for efficient and cost-effective products
- Involved in defining department strategies and tactics to meet client and corporate vision

October 2022 - September 2023
The Workshop - Malaga, Spain
Senior Engineering Manager

- Lead data engineering teams on their path to becoming high-performer and autonomous
- Represent the data engineering team towards senior management and stakeholders
- Define project timelines and milestones as well as risk management process
- Identify technological and practices opportunities and ensure their adoption and integration into the data engineering life-cycle
- Define and apply tactics to ensure alignment with corporate data strategies

April 2022 - October 2022
Ubisoft - Bordeaux, France
Manager, Development & Architecture

- Manage global data engineering and architecture teams to deploy enterprise data solutions
- Streamline internal processes for greater efficiency
- Research and identify technological and practices opportunities
- Maintain solid collaboration relations with internal and external partners
- Apply tactics to ensure alignment with corporate strategies and decision-making needs

March 2020 - April 2022
Ubisoft - Bordeaux, France
Architect & Lead Architect

- Defined, standardized, optimized, and deployed technical practices, processes, and analytical solutions for decision-making
- Researched and identified technological and practices opportunities and embedded them into the existing data engineering processes and frameworks
- Identified constraints and enforced technical best practices and coding standards
- Designed databases to meet tactical business reporting needs
- Collaborated with engineers, system architects and program managers to define and implement successful data infrastructure solutions

October 2011 - March 2020
Ubisoft - Montreal, Canada
Senior BI Developer & Tech Lead

- Defined, adopted, and optimized technical practices and processes
- Researched and identified technological opportunities
- Provided maintenance and development for the Enterprise Data Warehouse
- Involved in impact analysis, data modeling process and database performance analysis
- Designed and developed reports and dashboards for both operational reporting and top-management decision-making
